**“Literacy is the means through which anyone can realize his or her full potential”**

Dear Parents,

The International Literacy Day is celebrated world wide on 8<sup>th</sup> September every year to give the great importance of literacy to the individuals, society and communities. Celebrating the International Literacy Day is to promote the human attention towards the literacy and know their rights for social and human development. Literacy is as important as food to be alive and success. Literacy has the ability to raise the family status and hence the country status. It is celebrated to encourage the people towards getting continuous education and understand their responsibilities for the family, society and the country. Literacy is a person's ability to read and write. Reading and writing are important to help function in school, on the job, and in society.

Today Nursery Department of our school has taken a step to promote reading and writing for everyone. PrePrimarians distributed notebooks and pencils to the class four employees of the school and they were acquainted with the importance of literacy in their lives. They were encouraged by the little ones that they should motivate their children to read and write. There is always something that children could do to our nation and that emanates within them if we train them to be conscious about anything. Their age is the age of fast assimilation of things and circumstances so they learn fast.

It is our moral duty to impart knowledge to everyone. You as a parent can promote education by distributing notebooks and old books to the under privileged and tell them the importance of read and write. This one step may change one's life in a better way.

**On this Literacy Day, let us recall that Literacy for all is an integral part of education for all and both are essential for the development of nation.**

**PRINCIPAL**
