Dear Parents

As you all are aware “Dengue and chikungunya are two diseases transmitted by female Aedes mosquito and since there is no specific treatment for these, prevention of mosquito breeding remains the strategy of choice. To implement it, the MCD and the Education department implemented the “**Dengue Homework Card**” scheme and formation of children groups under a nodal teacher to identify breeding sites. The duration of the project will be 4 months (July – October)

Under this scheme the students will be given the “Dengue Homework Card” every Monday. Parents are requested to return the duly filled card every Thursday to the Class Teacher.
